## GRAVITY FEED DISPENSING STATION

### Clean & Dry Lubricants

The Y2K Gravity Feed Dispensing Station is a new product manufactured to keep your lubricants clean and dry. Use one of our standard filtration systems to fill them with pre-filtered fluids to dispense on demand. Extremely modular to fit all your application and lubricant needs. All Y2K products are 100% customizable.

- Use your existing filter cart or filtration system to fill with pre-filtered fluids.
- Custom options and additional features available upon request.

# GRAVITY FEED DISPENSING STATION

## Typical Applications

- Hydraulic Tanks
- Topping off tanks w/ pre-filtered fluids
- Lubricant storage & handling
- Dirty environments
- Lube systems & gearboxes
